Choose us as your exclusive supplier for cannabinoids and botanicals because we are the actual manufacturer, not a middleman or reseller.

By purchasing directly from our lab, you secure competitive pricing, excellent customer service, superior material quality, and a consistent ongoing supply for your brand.

Our **200,000-square-foot production facility** situated on 36 acres in North Carolina was designed with compliance in mind. We hold more certifications than any other lab in our industry. Our ability to oversee the entire production cycle under one roof sets us apart and ensures unwavering confidence in every product that leaves our facility. Every input material is tested in-house prior to production to ensure a consistent end product each and every time. AGS uses KCA to test every batch of finished goods to ensure accurate results for our clients

While we are highly respected in the industry for our product potency and safety, our real strength comes in our knowledge of cannabinoid chemistry and **our ability to create new and innovative products for our clients.**

If you have an idea; we can make it a reality.

Other services we offer include:

CUSTOM BLENDS

We are masters of in-house custom formulations, offering an unparalleled range of ready-made and bespoke formulations for your brand. Let our R&D team help you craft formulations that will set your business apart.

WHITE LABEL SERVICES

- ✓ Pre-roll Manufacturing
- ✓ White Label Services
- ✓ Gummy Manufacturing

DISCLAIMER

Pricing stated is our standard price for a **1kg purchase**. Please contact Adam and Steven for more accurate pricing based on your order quantity and frequency. AGS will always attempt to match or beat any price you are currently paying providing COAs are similar in potency and quality.

Delta Products

Name	Price
 Non-Detect Delta 8 using the P.A.N.D.A. method 	\$700/kg
 Delta 8 Clear	\$400/kg
 Delta 8 Gold	\$375/kg
 Delta 8 Amber	\$325/kg
 Delta 10	\$900/kg
 Delta 6	\$1,400/kg
 Delta 3	\$1,000/kg

 = Featured Product

Why you should consider Non-Detect Delta 8 for your brand

- Delta 8 THC% in the market varies significantly leading to end products that exceed 0.3% putting both your brand reputation and re-sellers at risk.
- Traditional Delta 8 is a 1 day reaction whereas our PANDA method takes upwards of 7-8 days to complete a reaction.
- The end result is a truly compliant Delta 8 that shows ND on a KCA result thus protecting your brand and your products in the market.

You're probably using our materials already without even knowing it.

 HHC-O		\$700/kg
 HHC-V		\$15,000/kg
 HHCV-O		\$17,000/kg

★ = Featured Product

HHC

HHC is making a comeback in our industry due to the ever-changing state by state regulations surrounding Delta 8. HHC is a great blend alternative for those seeking effects such as increased focus and a calming effect.

H4 CBD

A great alternative to traditional CBD as it has significantly more potency while offering similar health benefits without the high associated with THC.

You're probably using our materials already without even knowing it.
